

Saul Ramirez Ochoa

Objective To become a Java and Solutions Architect Sr, and an exceptional member of any team I get to be part of.

Contact Note Please if possible before making a phone call drop me a WhatsApp letting me know you are calling, nowadays there are a lot of marketing and scamming calls that I would like to avoid. Thank you =).

Profile My name is Saul Ramirez Ochoa, about my profile, well, this is something difficult to describe given my many different mixed roles over time, but I would describe myself as a Java developer Senior/Architect Jr, but also played System Analyst, Solution Delivery Analyst and lastly and but not less important Support Analyst, so I have a strong fundamental knowledge on most popular frameworks with different level of expertise of them, but also complementing with strong soft skills development when it comes to engage customers and working together to define a final solution.

I love playing with new tools, languages and technologies, maybe not becoming a chief expert on each matter because is almost impossible, but at least I acquire the knowledge and being aware of other approaches, designs, how-to's, design patterns and theoretical basis of other technologies.

In this field/profession, where reaching out the go-live of a software product, has become harder and harder because of different issues: budget, administrative issues, timing and staff turnover, just to mention some... remaining reliable and committed is very important, I consider myself the kind of person that, when times gets harder or complex, is the last, or one of the last ones on giving up on a project, so I think this is important to highlight on my profile and is something I can be super proud of.

Professional Highlights

- Travel to different acquired companies and sites to integrate their systems
- Learn manufacturing process and participate in several automation projects
- Learn and certified in MuleSoft, level 1 achieved.
- Become a proficient Oracle Agile PLM Administrator
- Automating change management processes in Agile for Documents, Routings, Part Numbers and Drawings.
- Leading Documents Control process implementation.
- Implementing continuous integration tools like Jenkins, Integration Tools like Maven, and Library server like Nexus in an IT department
- Program development and maintenance of programs with interface with Oracle EBS and OAC.

Saul Ramirez Ochoa

Soft skills

- Reliable
- Professional
- Proactive
- Team work
- Leadership
- Patient

Employment History

So far, I have worked in 4 IT companies and 1 Manufacture Company. Next I'm describing what are/were my roles during all this time, mentioning technologies, time, and references from people I worked with. Please feel free to get references of me at any time.

Company: Sensata Technologies

Period: January 2013 - Now

Locations: Aguascalientes

Activities: Development and maintenance of modules of enterprise applications, executing migrations, Analysis and Integration of acquired business into Sensata Systems Ecosystem.

I'm part o the team that Administrate a Product Lifecycle Management Tool called Agile PLM, that is owned by Oracle and have some native interfaces with Oracle ERP.

Project(s):

- Agile Administrator
- Securing objects in a PLM software
- Change Management for Routing changes
- Change Management for Documentation
- Acquired companies' integrations to Sensata ecosystem
- RISE migrating apps connected to from Oracle 11 to Oracle 12

Technological awareness applied:

- **Manufacture Software:** Oracle Agile PML
- **Programming Languages:** Java, SQL, Groovy
- **Databases:** Oracle, LDAP
- **Application Servers:** Tomcat, Weblogic
- **ORMs:** Ibatis, JPA

Saul Ramirez Ochoa

- **Back End Technologies:** NodeJS, Micronaut, Spring Boot, Mulesoft, RabbitMQ, Prisma
- **Front End Technologies:** JSF, Angular, Ember, bootstrap, CGI
- **Project Management:** Maven
- **SCMs:** SVN, Mercurial and Git
- **IDEs:** Netbeans and Eclipse
- **Continuous Integration Tools:** Hudson, Jenkins
- **Operating Systems:** Windows, Linux
- **Server Management:** Shell in scripting in bash and powershell for linux and windows.

Company: Softtek

Period: Ago 2012 – Dec 2012

Locations: Aguascalientes

Role(s): Software Engineer Senior

Activities: Development and Support for modules of enterprise applications

Project(s):

- Univeris

Technological awareness applied:

- **Programming Languages:** Java, MS VB 6.0, SQL
- **Databases:** SQL Server 2010
- **Application Servers:** IS, JBoss
- **Web Technologies:** JSF, JSP, Velocity
- **SCMs:** SVN
- **ORMs:** JPA
- **IDEs:** IntelliJ, SQL Management Studio, Microsoft Visual Studio
- **Continuous Integration Tools:** Hudson
- **Software Methodologies:** Agile and Exreme
- **Middleware Technologies:** Microsoft COM Objects, EJB3, JPA
- **Operating Systems:** Windows
- **Java Frameworks:** Maven 2.x, Velocity, J2EE

Saul Ramirez Ochoa

- **Web tools:** XSLT
- **Collaboration specifications:** XML, JSON
- **Project management tools:** JIRA
